Project Nyobe

700+ machines for polymerization and yarn production

SSMI is offering the complete production assets of Nyobe N.V. The plant produces high grade nylon 6 polymers and PA6 BCF yarns. All assets need to move from the current location. There are 3 polymerization lines with a total capacity of 75 tons per day.

The yarn production consists out of recent (2022) Superba heat setting machines and Rieter fiber spinning sets. All equipment is still installed. So don't miss you change to obtain complete engineered systems. The sale will end on the 31st of March 2025. Book your site inspection by email to sales@ssmi-ag.com

SUPERBA TVP/3 15m 60 wires

Yarn processing

SKU: SSMINYO1-00001

Year built: 2022

Conveyor belt width 300 mm

Heat-setting tunnel: 15 mtr

Inlet cooling chamber: 2 mtr

Cooling chamber outlet type TCC/3: 2 mtr

Incl. Winder type B401 SN B400000 490001

Considering scaling down? Choose SSMI for a worry free solution

Whether you operate in the Food, Chemical, or Pharmaceutical industry, SSMI is here to support your downscaling projects. We specialise in everything from removing single surplus machines to managing complete dismantling projects. Our approach ensures unused assets find new purposes, transforming potential waste into value while minimising disruption.
